Larson-Juhl’s Interactive Frame Design Tool

This design tool was created to help you visualize completed frame designs. Here are a few quick tips to help you use this innovative design tool. Pictures may take a minute to appear on the screen, depending on your computer and connection.

The Interactive Frame Design tool is accessed at www.larsonjuhl.com. You will find it under the Ideas & Inspiration category on the top menu.

On the landing page, click to begin.

Start by choosing an image. Click on “Artwork” in the dark gray band. You may upload one of your own or pick one from 6 we pre-selected in the “Choose an Image” box.

If you want to choose from a larger selection of art images, you will find over 3,500 at www.artthatfits.com. When you find the one you want, click “Return with Selected Artwork”

The artwork you selected from www.artthatfits.com will appear in the “Choose an Image box under the dark gray line, in the center of the screen. You will need to click on that image for it to populate in the design field above. This may take a minute.

For mat borders click on “Mats” in the dark gray band. Then in the lower left corner of your screen, click on 1, 2 or 3 for how many layers of matting you want. Then click on the white box next the Top Mat and select your color from the color chips to the right. Continue with each layer. Choose your mat border widths. Click the “Lock all Sliders” button if all sides are the same.

If you want to add a fillet inside a mat opening, click 1 to add one fillet or 2 to add two. Then click on the fillet profile shape in the new box that pops up and select the fillet you want from the samples at the bottom.
At any point during the entire process, you can click on “Frames” in the gray band. In this case we entered a specific moulding number in the search box at bottom center. The click “Click to View Frame Choices”

If you do not have a specific moulding in mind, you can go through all of the mouldings or reduce your search by fine choosing the color, style or width choices in the boxes at the lower left.

You also have an option to see a stacked frame combination. If you want to use this feature

At any point during the entire process, you can click on the zoom feature to see more detail. As you increase the zoom, you can move the picture around to see different sections.

Once you have a frame design you are happy with, you can choose to see it on a “wall” color. Select from a palette of Benjamin Moore paint colors or generic vibrant or muted colors.

Finally, you can e-mail your design to someone or print it out or save it to your documents for future use. To the right of the framed image is a list of the specific items you selected.
